- › Theme Functionality

Classic Themes Required Theme Files

1. **style.css**

Your theme's main [stylesheet](#) file. This file will also include information about your theme, such as author name, version number, and plugin URL, in its header.

2. **index.php**

The main [template](#) file for your theme. This will be the template for the homepage on your site unless a static front page is specified. If you *only* include this template file, it must include all functionality of your theme. However, you can use as many relevant template files as you want in your theme.

3. **comments.php**

The comment template which is included wherever comments are allowed. This file should provide support for threaded comments and trackbacks, and should style author comments differently than user comments. See the [Comments](#) page for more information.

4. **screenshot**

In the WordPress.org theme directory, the screenshot acts as a visual indicator of what your theme looks like. It is visible both in the web view and in the admin dashboard. The screenshot must not be bigger than 1200 × 900px.

While these files are the only files required by the theme review team for acceptance

Theme Check

By Themes Team

[Download](#)[Details](#)[Reviews](#)[Development](#)[Support](#)

Description

The theme check plugin is an easy way to test your theme and make sure it's up to spec with the latest [theme review](#) standards. With it, you can run all the same automated testing tools on your theme that WordPress.org uses for theme submissions.

The tests are run through a simple admin menu and all results are displayed at once. This is very handy for theme developers, or anybody looking to make sure that their theme supports the latest WordPress theme standards and practices.

How to enable trac formatting

The Theme Review team use this plugin while reviewing themes and copy/paste the output into trac tickets, the trac system has its own markup language.

To enable trac formatting in Theme Check you need to define a couple of variables in your

Minimale
 INFO unterdrücken.

Theme-Informationen:

Titel	Minimale	
Version	0.1.2	
Autor	Walter Ebert	
Autoren-Link	https://walterebert.com/	
Link zum Theme	https://gitlab.com/walterebert/wee-minimale	

1541 Tests laufen in **Minimale**.

1200x900 0k

Ein oder mehrere Fehler wurden bei Minimale gefunden.

WARNUNG: Es konnte kein Copyright-Hinweis für das Theme gefunden werden. Ein Copyright-Hinweise wird benötigt, wenn dein Theme unter der GPL lizenziert ist. [Erfahre, wie ein Copyright-Hinweis hinzugefügt werden kann \(öffnet in einem neuen Tab\)](#).

WARNUNG: Dein Theme erscheint in dem falschen Verzeichnis des Theme Namens. In diesem Verzeichnis sind **minimale**. (Falls das ein Child-Theme ist, kannst du den Fehler ignorieren.)

<https://gitlab.com/walterebert/wee-minimale>

WARNUNG: Es konnte kein Copyright-Hinweis für das Theme gefunden werden. Ein Copyright-Hinweise wird benötigt, wenn dein Theme unter der GPL lizenziert ist. [Erfahre, wie ein Copyright-Hinweis hinzugefügt werden kann \(öffnet in einem neuen Tab\).](#)

WARNUNG: Dein Theme erscheint in dem falschen Verzeichnis des Theme Namens. Der Verzeichnisname muss dem slug des Themes entsprechen. Korrekter slug und text-domain dieses Themes sind **minimale**. (Falls das ein Child-Theme ist, kannst du den Fehler ignorieren.)

ERFORDERLICH: Action `wp_body_open` oder deren Funktionsaufruf zu Beginn des Bodys oder direkt nach dem öffnenden `body`-Tags konnte nicht gefunden werden. Siehe [wp_body_open](#)

```
<?php wp_body_open(); ?>
```

ERFORDERLICH Tested up to: fehlt in deinem `style.css`-Header. Außerdem sollte es nur Zahlen beinhalten, also 5.0 und nicht WP 5.0

ERFORDERLICH Requires PHP: fehlt in deinem `style.css`-Header.

ERFORDERLICH Description: fehlt im Header deiner `style.css`.

EMPFOHLEN: Im Theme wurde kein Bezug zu `add_theme_support("custom-background", $args)` gefunden. Es wird empfohlen, diese Funktionalität zu unterstützen, wenn das Theme ein Hintergrundbild oder gesetzte Farben für den Hintergrund verwendet.

EMPFOHLEN: Im Theme wurde kein Bezug zu `add_editor_style()` gefunden. Zur Unterstützung des Anwenders wird empfohlen, dass das Theme ein Styling für den Editor enthält, damit der Inhalt des Editors mit der Ausgabe des Beitrags im Theme übereinstimmt.

EMPFOHLEN: Es wurde keine Referenz zu `register_block_style` im Theme gefunden. Theme-Autoren werden ermutigt, neue Block-Stile als Übergang zu Block-Themes zu implementieren.

EMPFOHLEN: Es wurde keine Referenz zu `add_theme_support("wp-block-styles")` im Theme gefunden. Es ist empfohlen, dass das Theme diese Funktionalität implementiert.

EMPFOHLEN: Es wurde keine Referenz zu `add_theme_support("responsive-embeds")` im Theme gefunden. Es ist empfohlen, dass das Theme diese Funktionalität implementiert.

EMPFOHLEN: Es wurde keine Referenz zu `add_theme_support("custom-logo", $args)` im Theme gefunden. Es ist empfohlen, dass das Theme diese Funktionalität implementiert.

EMPFOHLEN: Es wurde keine Referenz zu `add_theme_support("align-wide")` im Theme gefunden. Es ist empfohlen, dass das Theme diese Funktionalität implementiert.

EMPFOHLEN: Es wurde keine Referenz zu `register_block_pattern` im Theme gefunden. Theme-Autoren werden ermutigt, individuelle Block-Vorlagen als Übergang zu Block-Themes zu implementieren.

EMPFOHLEN: Dieses Theme scheint nicht die Standard-Avatar-Funktionen zu unterstützen. Verwende `get_avatar` oder `wp_list_comments` um die Unterstützung hinzuzufügen.

EMPFOHLEN: Die Einbindung des `comment-reply`-Skripts wurde nicht gefunden.

EMPFOHLEN: Das Theme enthält keinen Code zur Kommentar-Paginierung. Verwende `paginate_comments_links()` oder `next_comments_link()` und `previous_comments_link()`, um eine Kommentar-Paginierung hinzuzufügen.

EMPFOHLEN: `wp_list_comments` konnte nicht gefunden werden. Siehe [wp_list_comments](#)

```
<?php wp_list_comments( $args ); ?>
```

EMPFOHLEN: `comments_template` konnte nicht gefunden werden. Siehe [comments_template](#)

```
<?php wp_list_comments( $args ); ?>
```

EMPFOHLEN: `comments_template` konnte nicht gefunden werden. Siehe [comments_template](#)

```
<?php comments_template( $file, $separate_comments ); ?>
```

EMPFOHLEN: `comment_form` konnte nicht gefunden werden. Siehe [comment_form](#)

```
<?php comment_form(); ?>
```

EMPFOHLEN Im Theme wurde kein Bezug zu Beitragsbildern gefunden. Wenn das Theme Beitragsbilder hat, sollte dies mit `add_theme_support("post-thumbnails")` in der Datei `functions.php` umgesetzt werden.

EMPFOHLEN Im Theme wurde kein Bezug zu `the_post_thumbnail()` gefunden. Es wird empfohlen, dass das Theme diese Funktion verwendet, statt benutzerdefinierte Felder für Thumbnails.

EMPFOHLEN Dieses Theme scheint keine Schlagwörter anzuzeigen. Ändere es, um Schlagwörter an passenden Stellen anzuzeigen.

EMPFOHLEN Dieses Theme enthält keine Seitenleisten/Widget-Bereiche. Siehe [Widgets API](#)

EMPFOHLEN Die CSS-Klasse `.wp-caption` wird in deinem Theme-CSS empfohlen.

EMPFOHLEN Die CSS-Klasse `.wp-caption-text` wird in deinem Theme-CSS empfohlen.

EMPFOHLEN Die CSS-Klasse `.sticky` wird in deinem Theme-CSS empfohlen.

EMPFOHLEN Die CSS-Klasse `.gallery-caption` wird in deinem Theme-CSS empfohlen.

EMPFOHLEN Die CSS-Klasse `.bypostauthor` wird in deinem Theme-CSS empfohlen.

EMPFOHLEN Die CSS-Klasse `.alignright` wird in deinem Theme-CSS empfohlen.

EMPFOHLEN Die CSS-Klasse `.alignleft` wird in deinem Theme-CSS empfohlen.

EMPFOHLEN Die CSS-Klasse `.aligncenter` wird in deinem Theme-CSS empfohlen.

INFO: In diesem Theme wird nur eine `text-domain` verwendet. Stelle sicher, dass diese dem Theme slug korrekt entspricht, so dass das Theme kompatibel zu mit den WordPress.org Sprachpaketen ist. Die Domain, die gefunden wurde, ist `wee-minimale`.

INFO Die CSS-Klasse `.screen-reader-text` wird von WordPress generiert und muss über dein Theme-CSS passend dargestellt werden. Siehe [den Codex \(engl.\)](#) für eine Beispiel-Implementierung.

INFO `Tags:` ist entweder leer oder fehlt im Kopfbereich der `style.css`.

best open source WordPress themes around. Themes hosted on WordPress.org pass on the same user freedoms as WordPress itself; this means that they are 100% GPL or compatible.

Guidelines & resources

To ensure that WordPress users are guaranteed a good experience, every theme in the directory is reviewed by the Themes team. Your theme will have the best chance of being approved if you:

- Read the [theme review guidelines](#) and follow the [submission requirements](#).
- Test your theme using the [Theme Unit Test data](#) before you upload and submit.

For more theme development resources, check out the [Theme Developer Handbook](#). For specific questions, please use the [Themes and Templates forum](#).

Upload your theme

[@kafleg](#) Accessibility assessment; will leave it to you to follow up for next steps.

Overall: Fail, with minor issues to address.

Note: Theme does not support displaying comments on Pages that have comments, which last I checked was a requirement for themes.

1) Keyboard Navigation: Pass.

- No dropdown menus to test.
- Uses inherited browser focus styles. This may not be sufficient for all users in all browsers, but does not fail requirements.

2) Controls: Pass.

- No search form, no extra controls.

3) Skip links: Pass.

- Inverts the order of content and navigation by placing navigation in the footer, and the skip link matches that pattern. This technically does not meet the bullet point 'Move focus to the main content area of the page', but those instructions assume the standard sequence of navigation > content, which this does not use.

4) Forms: Pass.

- No changes present.

5) Headings: Fail

- Archive pages including the home page do not have H1 headings.

6) Landmark Roles: Pass

7) Content links: Fail

<https://themes.trac.wordpress.org/ticket/130227#comment:7>

Overall Fail 🤯

Overall: Fail, with minor issues to address.

Nacharbeiten

- Farbkontrast der Unterstriche von Links
- CSS für Screen Reader Text

<https://make.wordpress.org/accessibility/handbook/markup/the-css-class-screen-reader-text/>

- Focus-Styles

- RECOMMENDED: No reference to `add_theme_support("custom-background", $args)` was found in the theme. If the theme uses background images or solid colors for the background, then it is recommended that the theme implement this functionality.
- RECOMMENDED: No reference to `add_theme_support("custom-logo", $args)` was found in the theme. It is recommended that the theme implement this functionality.
- RECOMMENDED: No reference to `add_theme_support("align-wide")` was found in the theme. It is recommended that the theme implement this functionality.

Introducing the weet theme

2023-06-21 [@walterebert@wee.press](mailto:walterebert@wee.press)

The weet theme is fast and focuses on text. It might appeal to you, if you like a minimalist look or just want a setup, that doesn't load a lot of stuff you are not using. To achieve these goals, somewhat unusual features were created.

weet is a combination of the words wee and theme. Wee meaning small. It also happens to be the abbreviation for walter.ebert.engineering. I know, wee can also mean piss. So let's just say it's not 🤢.

This site uses weet with a child theme to customise some stuff: templates, web fonts, CSS, theme images.

Performance is one of the main features of the weet theme. To make it fast, a couple things were done:

- Write a minimal amount of CSS.
- Inlining the theme CSS.
- Use no JavaScript.
- No support for featured images.
- Disable the default WordPress styles 🙏.

Don't worry, you can enable the default WordPress styles (the Customise, under "Theme Options" (yes, it is a classic theme)). The reason to not load the default styles is performance. I usually make huge bundles of <https://wee.press/posts/introducing-the-weet-theme/>

Less is more

22 July 2024 · wee writer

The aphorism is often used in design and architecture. It was popularised by German architect Ludwig Mies van der Rohe, who heavily influenced modernism since the 1920s. First as director of the Bauhaus, a school for art, design and architecture in Weimar, Germany. After he emigrated to the United States from Nazi Germany, he later accepted the position to head the architecture school at what is now called the Illinois Institute of Technology.

The Barcelona Pavilion by Mies van der Rohe and Lilly Reich from 1929 is a classic example of the design principle. It calls for the removal of decoration. Favouring simple shapes and forms, and letting materials speak.

Read the requirements before updating a theme

In order to have your theme hosted on [WordPress.org](#), your code is required to comply with all the [requirements on the Themes Team handbook page](#).

Before you can upload a new theme, [please log in](#).

How to upload a theme update

If you are uploading a theme update, simply increase the version inside of `style.css` and upload the `theme-name.zip` file again, just like you do with a new theme.
